

Land Type Association of the WESTERN PRAIRIE

Lta	Name
222Md03	Somerset Moraines
222Md08	Deer Park Prairie
222Md06	St. Croix Prairie
222Md06	St. Croix Prairie
222Md07	New Richmond Prairie
222Md09	Emerald Prairie
222Md12	Cady Moraines
222Md11	Baldwin Moraines
222Md10	River Falls Eroded Moraines
222Md10	River Falls Eroded Moraines

Landtype Association (LTA) information depicts subregional and landscape ecological units developed according to the classification scheme of the National Hierarchical Framework of Ecological Units (NHFEU) (Avers et. al, 1994). The NHFEU is an ecological classification system that divides landscapes into ecologically significant regions, at multiple scales, on the associations of biotic and environmental factors, including climate, physiography, water, soils, air, hydrology, and potential natural communities. The Landtype Associations were developed, mapped, and described in participation with a variety of agencies, organizations, and individuals. This data is reviewed annually.

FEUNW92D is a 1:250,000 data source produced by the WI LTA Project Team.

The data shown on this map are available on a cost of resources basis from WDNR, GeoServices Section. See the "GIS Datasharing" section, visit <http://www.dnr.state.wi.us/org/at/et/geo/>. This data layer is included in DVGISub, a part of the DNRView extension to ArcView. DNRView makes it easier to use and share DNR geographic data. Trained ArcView users can obtain DNRView from the appropriate regional contact listed in the "GIS Datasharing" section.
